Art Unit: 1648

The following is an examiner's statement of reasons for allowance: SEQ ID NO 1 and 2 are found in application US 2002/0127584 A1 (see specifically SEQ ID NO: 227 and 228), however, the application does not provide any teaching of amplifying specific regions within the nucleic acid sequence. The application also does not teach that mutations associated with the sequences are associated with hearing loss. The application does not provide any teaching to point to the amino acid residues of proline at residue 51, valine at residue 66, glycine at residue 88 or tryptophan at residue 117 and their role in hearing loss. Thus the application of US 2002/0127584 A1 cannot serve as prior art when it does finally issue into a patent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
